Highway 81

Nursery Location:

San Antonio Highway  
1½ miles North of  
City limits

# WHEN YOU BUY FROM US YOU BUY DIRECT FROM ONE OF THE LARGEST ORCHID IMPORTERS

WE SELL TO DEALERS THROUGHOUT THE UNITED STATES  
WHO IN TURN, SELL TO YOU.

We do not have listed here all the plants that it is possible for you to grow in your home neither can we list all the plants that we have. We are collectors and find many plants that we cannot list for they are scarce, we would not be able to have them in stock all the time. We will send out specials on our mailing list if you have purchased from us this year. If not it will be necessary for you to mail us a letter requesting these specials.

We collect our own plants and import them. Being located here directly on the border where we can import and clear our own plants through the customs enables us to give you the freshest collected plants on the market.

Specimen plants listed on back pages of this folder.

## Conditions of Sale

On holidays and specials sales, orders will be filled in rotation. The rest of the time we ship on Monday and Tuesday so orders can be delivered before Saturday.

No substitutions will be made on orders without authorization. But please give second choice.

All prices are F. O. B. Laredo, Texas, via Railway Express. If parcel post is requested we will pay postage and send C. O. D. for amount of postage. We can not be responsible for parcel post shipments for we can not insure them.

Claims for loss or damage must be filed immediately with the carrier by the consignee. We pack carefully and responsibility for safe arrival is entirely that of the carrier. Plants can only be insured if sent to you by Railway Express.

We give no warranty, expressed or implied, as to the productiveness of any of the plants we sell, and will not be in any way responsible for the crop. Our liability is limited to the purchase price of these plants.

We will send your order Post Paid at your risk and send C.O.D. for amount of Postage.

# EASY SUGGESTIONS FOR POTTING AND WATERING ORCHID PLANTS

We are not experts, this is just to help those that are not familiar with handling Orchids. This is also the way we pot and care for our plants. We grow them very successfully.

## WHEN USING OSMUNDA

Place your Osmunda Fiber in a large container and soak for an hour or more. Shred in small pieces for easier handling. Fill flower pot  $\frac{1}{4}$  with pieces of charcoal or pieces of broken flower pots. Some use small stones. This is to insure good drainage. Then pack your Osmunda Fiber one piece at a time using a potting stick (piece of wood, sharpened like pencil on one end). Be sure your fiber is packed well. If your plant does not have roots pack fiber to about 1 inch from the top of pot and then cut some very stiff wire and shape it like a hairpin and fasten your plant (with hairpin) on the fiber. Be careful never to cover your bulbs with fiber. Use only clay pots never use glazed.

If you prefer your plants in baskets use the same method, always making sure your plants are secure and not loose. You can tie the wire through bottom of basket. If your plant is potted correctly you will be able to pick pot up with plant and it will not come out.

## WHEN USING FIR BARK

Orchid Bark should be moistened before using because it is easier to handle and will respond to watering much better after potting. We recommend the removal of all of the Osmunda fiber from the roots before potting in Bark. Initially, this is a task, but after the plant is once potted in Fir Bark, it is easily repotted the next time. Fine grade is recommended for terrestrial orchids and with those where constant moisture is desirable

We have discontinued the use of Osmunda fiber, as have so many other dealers. Fir Bark or Wonder Bark is so much easier to use. Even a child could pot an orchid. Sales have increased by leaps and bounds since the ladies can do their own potting. You will save time and money and the results will amaze you. The roots start growing almost immediately.

Water your potted plants well and allow them to dry out, then water again thoroughly.

We don't care how Mr. or Mrs. So-and-So pots, mounts or waters their plants. This is the way we handle ours and we have great success with them.

We do recommend our customers to join a good Orchid Society, that way you can learn anything new that comes up, new growing methods, etc. It will not cost you a lot and you will enjoy every page. There are other dealers listed in them but we are not afraid of competition. If any one can sell the same quality and size plants we do for the money we would be happy for you to buy from them. Our plants are exactly as described in this folder. We sell on a money back Guarantee. Out of almost 1,000 orders, we had one reported frozen. We ship throughout the year.

# AMATEUR COLLECTORS SPECIAL

**3 Plants \$6.00**

We always have a special of 3 plants for \$6.00. These are un-established bare root plants. You will receive our choice and they will be plants that we happen to have the most of when your order arrives. These plants have bloomed and are not seedlings but full size plants that will bloom at their normal blooming time. If you do not want to bother buying material to plant them, we will mount them for \$3.00 making a total of \$9.00.

## COLLECTION NO. 2 FOR THE ADVANCED COLLECTOR

### **BLACK ORCHID**

### **COLLECTION**

This is a collection of Orchids that are harder to obtain and of the very best stock. Also they are largely selected from thousands of plants. Being so large we would rather send Railway express as heavier packages are just as reasonable sent Express as Parcel Post and they are automatically insured. Order No. 2 Black Orchid. 10 plants mounted \$25.00. We Guarantee these plants. If they should be planted in a basket mounted on cork, or fern, we will plant them the way they will grow best. We have circulars from other dealers that charge as much as \$20.00 for one of these plants. This includes THE BLACK ORCHID.

**10 Plants  
Mounted \$25.00**

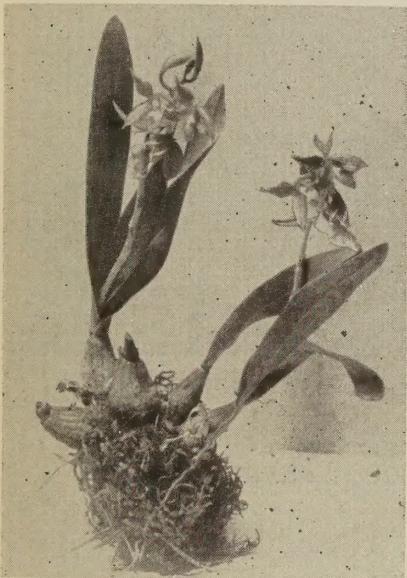

**STANHOPEA TIGRINA**

### **BLACK ORCHID**

Stanhopea Tigrina, the so called Black Orchid Flowers 7 inches across. Sepals and petals dark maroon blotched on all sides with maroon purple. The middle and interior parts whitish spotted with purple. May, July, Mexico, Venezuela. Do not pot this plant. It must be planted in baskets for the blooms come from the bottom. Bare Root \$3.50, Mounted \$4.00 specimen plants in basket \$10.

# EPIDENDRUMS

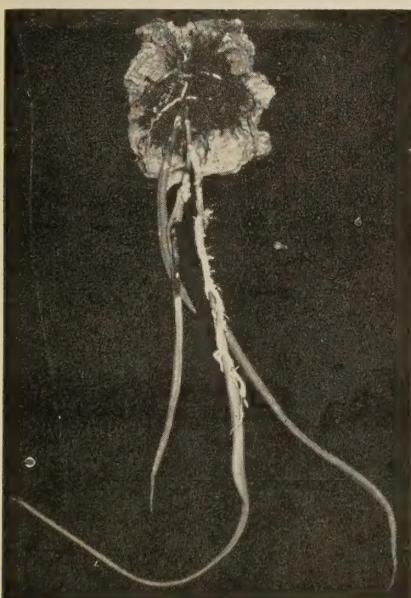

EPIDENDRUMS— Epiphytic Orchids native in Tropical America. They are plants of various habit and require intermediate temperature. We have several collectors that like these species so well that they do not want any others. It is understandable for they range from the tiniest blooms to very large. Colors range from dark purple to pure white, golden yellow to rust, dark brown and maroon.

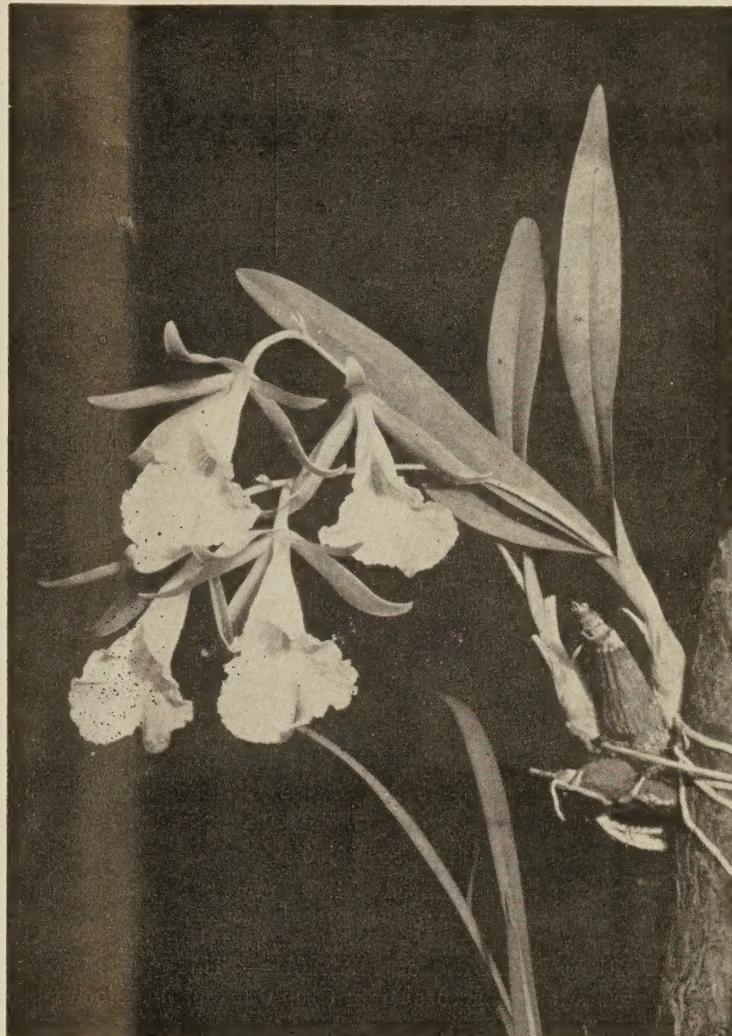

**EPIDENDRUM VITELLINUM**

Pseudo bulbs to 2 in high, with 2-3 lvs. to 12 in. long; infl. loosely racemose or paniculate, several to many-fld., to 1½ f. long; fls. Cinnabar red, to 1½ in across. May-Oct. Mexico. Guatemala.

B. R. \$ 3.50      Mounted \$ 4.00

**EPIDENDRUM FALCATUM**

**EPIDENDRUM MARIAE**

EPIDENDRUM MARIAE - Dainty white flowers. This plant is naturally a small growing variety. We never seem to have enough to fill our retail demand and are hardly ever able to wholesale them. It is not always available.

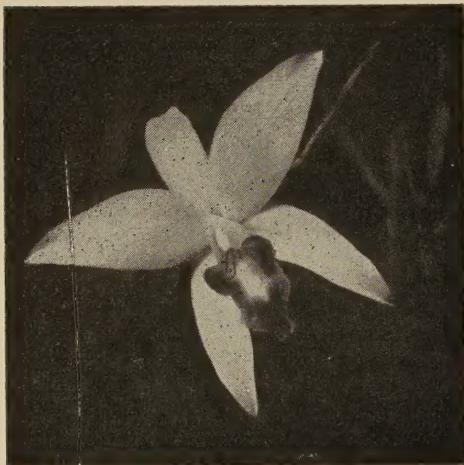

Bare root plants \$ 2.00

Mounted \$ 3.50

EPIDENDRUM FALCATUM - White spidery flower about 5 inches across. Flower lasts about three weeks or more the last several days the flowers turn orange. This is a very interesting plant. We recommend planting in a basket or better still to mount it on a raft. Some of these plants are over a yard long. Blooms April and May. We sell them mounted on Cork bark or fern root slabs. Bare Root \$ 3.50      Mounted \$ 4.50

# —LAELIAS NATIVE TO TROPICAL AMERICA—

Epiphytes with one or two leaves, pseudo, bulbs, and flowers solitary or in racemes, very showy, the sepals and petals similar, lip 3 lobed. They thrive in an intermediate temperature. These are corsage type flowers.

FLOWER OF LAELIA ANCEPS

LAELIA ANCEPS

All the following plants are available BARE ROOT OR MOUNTED ON FERN ROOT SLABS.

LAELIA ANCEPS -- Flowers about 4 inches across, violet rose, lip t' wny yellow, throat lined with purple. These flowers will last several weeks. One of the easiest plants to bloom.

Bare Root \$2.50  
Mounted \$3.75

LAELIA SUPERBIENS -- Pseudo bulbs to over 1 ft. high, with 2 lvs. to about 1 ft. long; infl. to 6 ft. high flowers 5-7 inches across clustered at summit of peduncle, fragrant; sepals and petals rose-marine; Lip purple with yellow throat. Dec. - Feb. Central America.

Large \$ 7.50

LAELIA RUBESCENS— Many flowers White to rose purple., lip dark purple base to lip. Blooms Sep. Mar. July

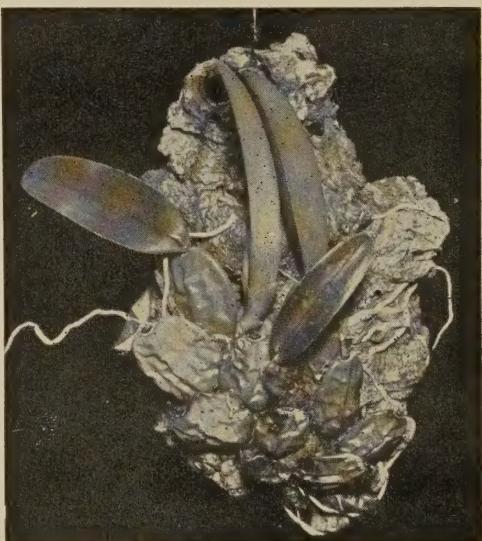

Bare Root \$3.50  
Mounted \$4.50

LAELIA GRANDIFLORA or MAJALIS— This plant has large Flowers to 9 in across, light Orchid to purple. Blooms Easter and Mother's Day. Flower lasts 4 to 6 weeks.

Bare Root \$3.50  
Mounted \$4.00

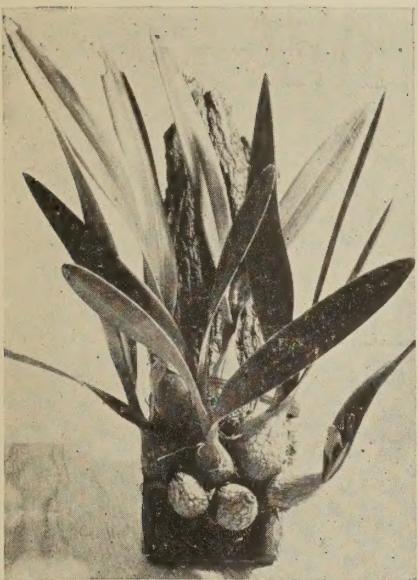

LAELIA AUTUMNALIS—4 to 9 flowered to 4½ in. across. Rose purple lip white near base. Blooms Oct. April Easy to bloom.

Bare Root \$3.50  
Mounted \$4.50

LAELIA ANCEPS

LAELIA ALBIDA -- Pseudobulbs to 2 inches high with leaves to 7 inches long; racemes loosely 3 - 9 flowers - to 20 inches, long, flowers about 2 inches across, fragrant. White often tinged with rose; lip with 3 central yellow ribs. Blooms November to Jan. . . \$ 3.50

#### EPIDENDRUM AROMATICUM

EPIDENDRUM STAMFORDIANUM-Central America  
A bifoliate-type similar to Epi. ciliare in growth. Flower spikes appear at base of bulbs in long sprays of greenish-yellow flowers with dark spots. Spring

**\$ 5.50**

EPIDENDRUM HANBURII - This is a very attractive Epidendrum. The plant itself looks a lot like Epidendrum Nemorale. The flowers are about 1 in. greenish bronze.

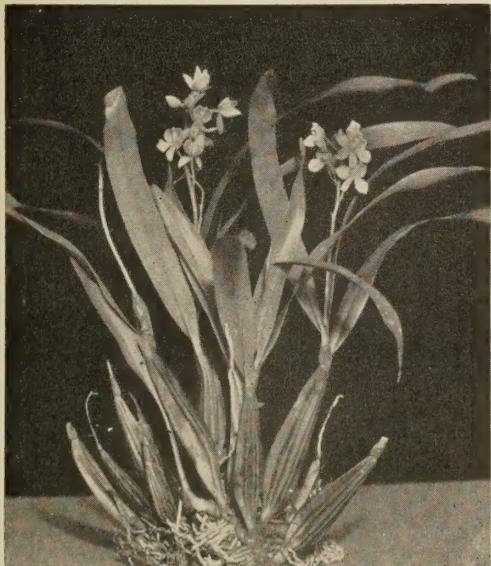

Blooms Feb. to April. Easy to bloom and flower very long lasting

Bare Root \$2.50

Mounted \$3.50

EPIDENDRUM CILIARE - A very lovely yellowish green Flowers about 4 inches in size. Sepals and petals greenish-white, lip pure white, very fringed requires the same treatment as Cattleya plants, Flowers all year.

**\$ 4.00**

#### EPIDENDRUM FRAGRANS

EPIDENDRUM AROMATICUM - Flowers range in color from pale yellow, olive green to a deep rust color. These flowers are very fragrant and long lasting. This is one of our favorites for you can't fail to make it bloom.

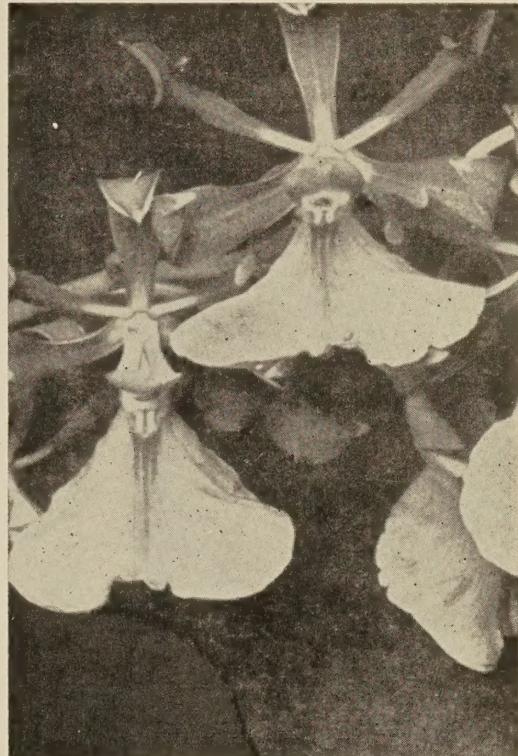

5 to 8 bulb plant	Bare Root \$2.50	Mounted \$3.50
Specimen plants.	Bare Root \$3.50	Mounted \$5.00

EPIDENDRUM NEMORALE - Flowers Rose to purple has about 8 flowers on stem 4 inches across and up. This is a good plant and a favorite with everyone. Blooms April to July.

Bare Root \$3.50	Mounted \$4.50
------------------	----------------

EPIDENDRUM PENTOTIS - Spike short terminal flowers, yellowish about 3 inches, fragrant, lip white with purple. March to May. Central American Variety.

Bare Root \$3.00	Mounted \$4.00
------------------	----------------

#### EPIDENDRUM ATROPURPUREUM

EPIDENDRUM ATROPURPUREUM - 4 to 13 flowers 3 inches across. Sepals and petals greenish brown, often tinged with purple; lip white or yellow with purplish stripes.

December to March, Mexico to Panama.

Bare Root \$4.50	Mounted \$5.50
------------------	----------------

EPIDENDRUM TAMPENSE - This plant has been so greatly advertised that we don't need to say much about it. Sepals yellowish green and tinged with brown. Petals similar but browner. Lip 3 lobed, white with magenta purple lines, lobe nearly orbicular, some times white or magenta.

Bare Root \$2.00	Mounted \$3.00
------------------	----------------

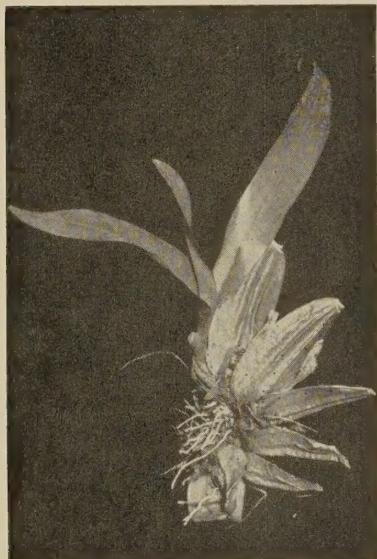

EPIDENDRUM FRAGRANS - Flowers very fragrant Few to several flowers; racemes, sepals and petals yellowish white; lip lined with violet. Blooms all year.

Bare Root plants \$3.00	Mounted \$4.00
-------------------------	----------------

# ODONTOGLOSSUMS ARE EPIPHYTES

## TROPICAL AMERICAN ORCHIDS WITH 1 TO 2 LEAVES

Pseudo bulbs and flowers in lateral racemes or panicles, the sepals and petals nearly equal, the lip with claw parallel to column and spreading midlobe. The Cult species are mostly native in high elevations and are a little difficult if you cannot give them a cool place to grow. They require a cool house. Some of these plants are not to difficult even in hot climates. We have bloomed *O. Pulchellum* and *Odontoglossum Citrosmum* here in Laredo. Many times throughout the year you will hear on the weather broadcasts that Laredo was the hot spot of the nation. All *Odontoglossums* will not grow here, that is the reason you will only find a few of them listed here.

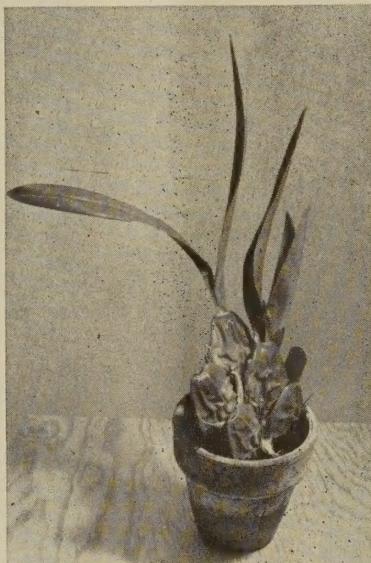

**ONCIDIUM  
LEUCOCHILUM**

Up to 10 flowers about  $3\frac{1}{2}$  inches across; sepals and petals golden yellow blotched with red brown. Lip white or yellow, at base cinnamon brown bordered with white or yellow above.

March to May. Colombia.

Bare Root	\$4.50
Mounted	\$5.00

**ODONTOGLOSSUM  
CITROSMUM**

Many flowered, commonly, racemose flowers about  $2\frac{1}{2}$  inches across. Sepals and petals white or sometime rose tinted; lip rose to lilac. This should be planted in a basket or mounted as the flowers hang down.

Bare Root	\$3.50
Mounted	\$4.00

**ODONTOGLOSSUM  
PULCHELLUM**

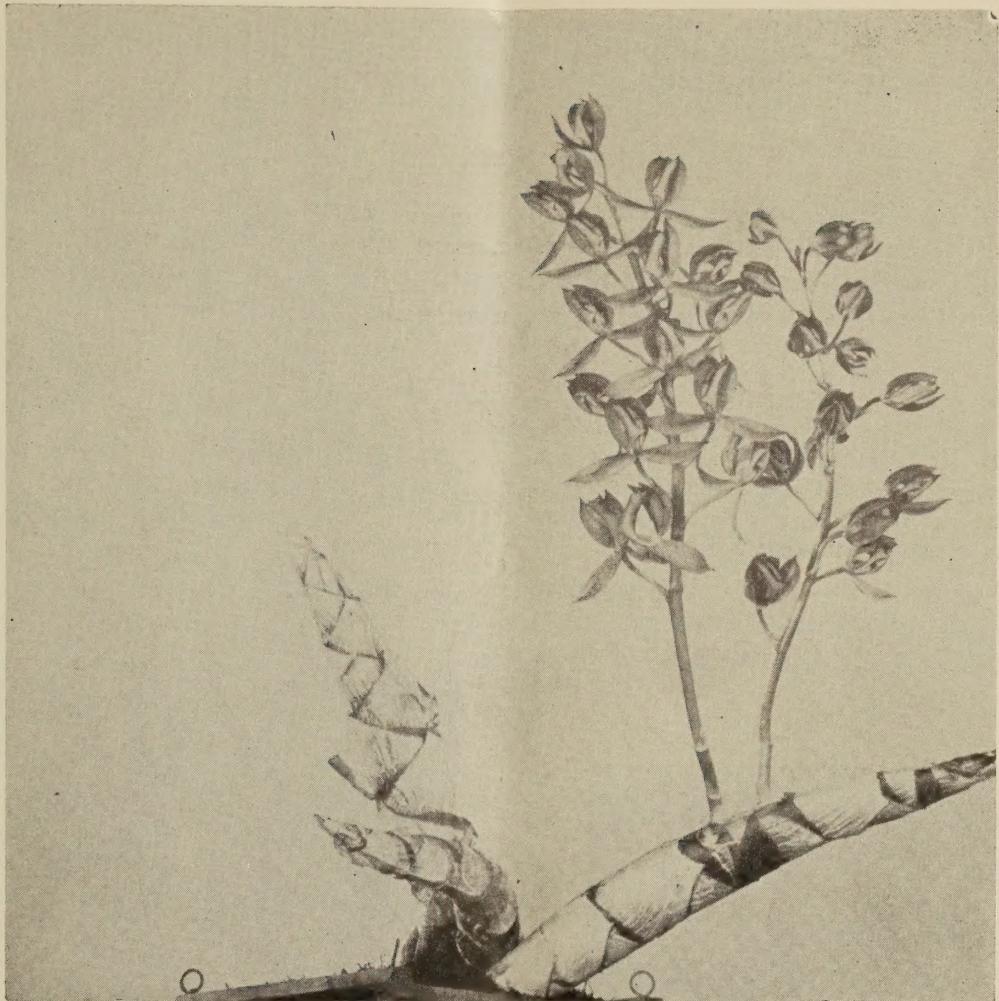

Lily of the Valley Orchid. Up to 10 flowers  $1\frac{1}{2}$  inches across, fragrant, white except at base of lip, which is yellow dotted with red December to May. Central America.

Bare Root	\$3.50
Mounted	\$4.50

**ODONTOGLOSSUM ROSSII** - Many flowered 1 to 5 on stem. 2 to 3 inches across. Sepals white or pale rose spotted with brown; petals white, rosy white spotted white brown at base; lip white; rosy or pale yellow with yellow basal crest. February, April, August, October. Guatemala

Bare Root \$2.50

Mounted \$3.50

**MORMODES IGNEUM**

MORMODES IGNEUM - Flowers Gold-bronze. The sepals and petals have green longitudinal strips and are covered with small reddish dots. Panama and Colombia      Limited \$ 7.50

MORMODES COLOSSUS - A very effective species of large growth the stems subterete, tapering upwards, sometimes a ft. long large spreading flowers 5 to 6 in. across, narrow, lanceolate acuminate sepals and petals, of which the lower part is pink with darker pink veins, the upper half yellow and lip is bright yellow, dotted with pink at base, much incurved with edges revolute meeting at the back, and the green arching colum is twisted to one side as usual. It is a most singular and wonderful plant. Central America.      \$5.50

ONCIDIUM TIGRINUM - This is not a large plant by nature, but it is one of the best oncidiums and has beautiful showy long lasting flowers about 3 inches across. Sepals and petals orange-yellow blotched with brown; lip large and yellow blooms. October to February

Bare Root \$3.50

Mounted \$4.50

ONCIDIUM CEBOLLETA - Bulbs small with 1 slender cylindrical leaf up to 23 inches long in flower; commonly paniculate and many flowered to nearly 4 ft. long. Flowers rather large dull to bright yellow; spotted with red-brown, blooms January to May.

Bare Root \$3.00

Mounted \$ 4.00

**ONCIDIUM CEBOLLETA**

ONCIDIUM KRAMERIANUM - Pseudo bulbs flattened-obicular, 1 lvd., 1f to 9 in. long Infl. to 30 in. long flowers very large, 5 in. across, dorsal sepal and petals chocolate-br. lateral sepals orange-red mottled with yellow; lip wavy citron yellow bordered by reddish-brown, March, May, Nov. and Dec. Colombia.      \$ 8.50

# ONCIDIUMS ARE EPIPHYTES

NATIVE to tropical America with commonly 1 and 2 leaves; pseudo bulbs and flowers lateral racemes or panicles. The sepals and petals often nearly equal, the lip usually 3 lobed and crested or tubercled at base. These are plants of both cool Mts. and low hot regions, of various requirements and culture. Depending on the species; they usually require considerable sun and air.

**ONCIDIUM CARTHAGINENSE**— Grows and looks almost exactly like Cavendishianum. The only way we can tell them apart is by keeping them separate as they grow in different locations.

Bare Root \$3.00

Mounted \$4.00

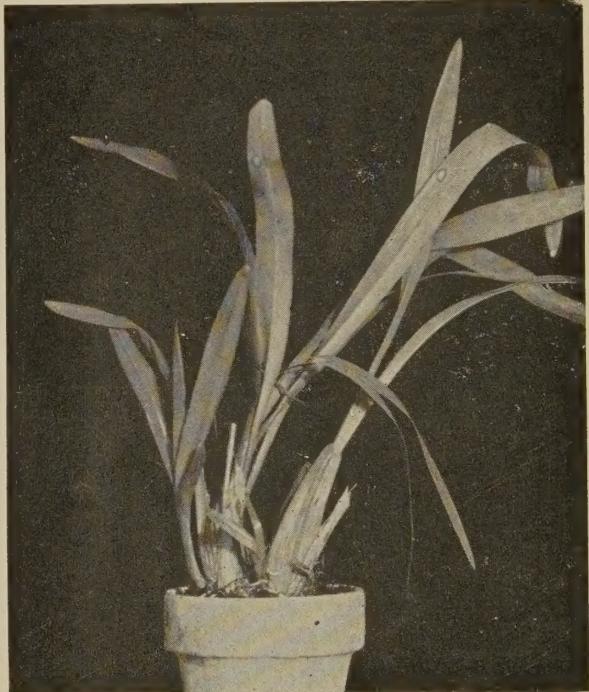

FLOWER OF CAVENDISHIANUM

**ONCIDIUM CAVENDISHIANUM** — Pseudo bulbs much reduced, with 1 oblong elliptic leaf to about 1 ft. 1 in. flower usually paniculate, and many flowered fls. rather large, yellow; sepals and petals commonly spotted with brown. Blooms October to May grows from Mexico to Guatemala. Bare Root \$3.00 Mounted \$4.00

**ONCIDIUM LURIDUM**— Differs from Carthaginense in its larger flowers and dull red to yellowish brown sepals and petals which are sometimes tinged with violet. Central America.

Bare Root \$3.50

Mounted \$4.50

**ONCIDIUM SPHAELATUM**— I have seen these plants with as many as 1,000 flowers on a stem almost 5 ft. long. Flowers about 1 in. across; sepals and petals yellow, spotted with brown. Lip golden yellow with red brown band in front of crest. These flowers are long lasting. February to September.

Bare Root \$3.00

Mounted \$4.00

**EPIDENDRUM COCHLEATUM**

**ONCIDIUM ORNITHORYNCHUM** - Lovely sight in bloom. Many rose Lilac Flowers on a short spike, very, very fragrant. August, December, Mexico to Salvador \$3.50

**EPIDENDRUM COCHLEATUM** - This plant has a lot of lovely green foliage and is a nice looking plant even when not in bloom. After it is established it will stay in flower most of the year. Dark lip almost black. Greenish yellow sepals and petals. Not a corsage type flower but you will find this in almost every good collection. \$3.00

**EPIDENDRUM ALATUM** - (Mexico-Nicaragua) Pseudo-bulbous type Stems terminal, long spikes; green, brown flowers. Summer \$4.00

**ONCIDEUM MACULATUM** - This will be a favorite with everybody that has one. The flower looks almost like a miniature Odontoglossum Grande. Flowers about  $1\frac{1}{2}$  inches across. The one in photo had two stems with about 40 flowers and the bloom lasted over two months. This photo was made after 6 weeks in bloom and was sent parcel post to Mass., where the photo was made. We were afraid the flowers would die, many of the flowers fell off in packing but several still remained.

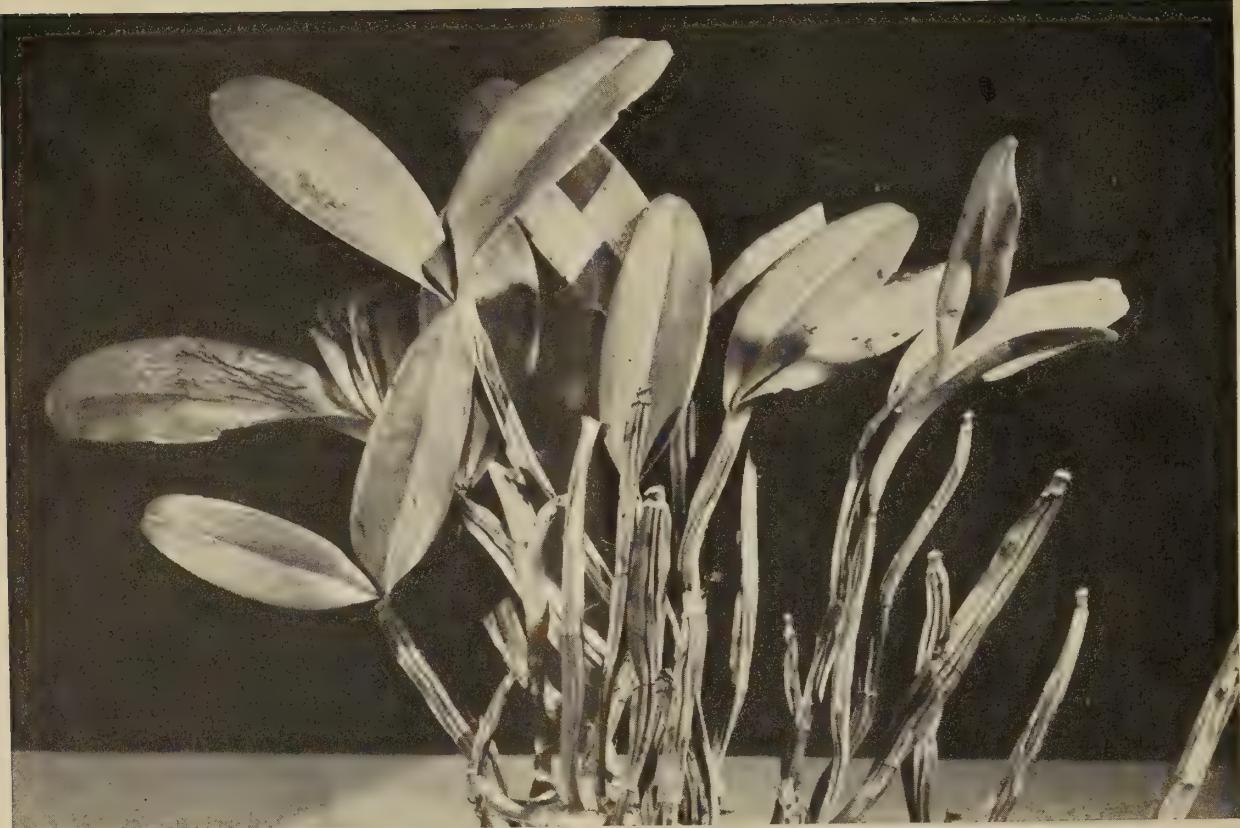

Bare Root \$3.00

Mounted \$4.00

**ONCIDIUM SPLENDIDUM** Dancing Girls - Somewhat small, stiff pseudobulbs with one very stiff, leathery leaf, about 10" long. Scapes are erect, branched, about 2' long. Flowers are large, sepals and petals yellowish-green; barred and blotched with rich-brown recurred at the tips. Lip is large, flat, clear-yellow. \$5.50

**ONCIDIUM MACULATUM**

**CATTLEYA SKINNERI** - Leaves 2, elliptic, to 8 in. long, flowers 4 to 5 in. across 4 to rarely 13 together. Rose-purple with yellowish white in throat of lip. Blooms January to August, Central America. Root Bare \$4.50

**CATTLEYA BOWRINGEANA** - The very well-known, bifoliate Cattleya which produces quantities of blooms about 3 inches in size. Rose-purple sepals and petals with much darker color on front lobe of lip. \$7.50

**C. AURANTIACA** - This very handsome brilliant clear orange red flowering species attracts everyone. Flowers 3 in. across when open. Flowers February to March. \$5.00

**BLETIA PURPUREA** - (Miniature) \$3.50

**LYCASTE SKINNERI** - Flowers large and beautiful. Sepals white, more or less suffused with rose; petals smaller, usually marked with deep-rose. Lip whitish, thickly spotted with rose and crimson. \$ 5.00

**CYCNOCHES CHLOROCHILON** - Most unusual epiphytes that are called the Swan Orchids due to the formation of the long slender arched column. Grow with Cattleyas, but keep very dry when dormant. Give plenty of light. Beautiful large green flowers up to 6 in. across. A fine corsage flower.

Bare Root \$ 5.00

**CATTLEYA CITRINA**— This plant is called The Tulip orchid; strap shaped leaf; flowers citron yellow lip white on edges and wavy, drooping. Mount with leaves and bulbs hanging down. April to June Mexico. Bare Root \$3.00 Mounted \$3.50

# SCHOMBURGKIA TIBICINIS

These are naturally a very large plant, pseudo bulbs subcylindric hollow to 24 inches tall with 2 leaves; many flowers  $3\frac{1}{2}$  inches across. Sepal and petal very wavy marined, red-brown lilac or burnt orange; lip whitish with yellow center and lilac apex. February to August.

Bare Root \$4.50

BRASSAVOLA CUCULLATA

## BRASSAVOLA

BRASSAVOLA CUCULLATA Flowers usually solitary, the sepals and petals orange yellow or white. Lip white, toothed on edges with long point.

Bare Root \$3.00

Mounted \$3.50

BRASSAVOLA DIGBYANA - The most outstanding species of the Brassavolas and the most used in modern B. C. hybrids. Flowers are green to white-green and have a large fringed labellum. Season variable. Flowering size.

\$5.50 to \$10.00

BRASSAVOLA GLAUCA— Pseudo bulbs or sts. clavate to 4 inches high, 1 leaved, leaf to over 6 inches long, fleshy; 1 Infl. 1 fld. about as long as the leaf springing from an elongate flattened spathe. Fls to  $5\frac{1}{2}$  in. across, sepals and petals pale olive-green, lip cordate, convolute around the column, at base white.

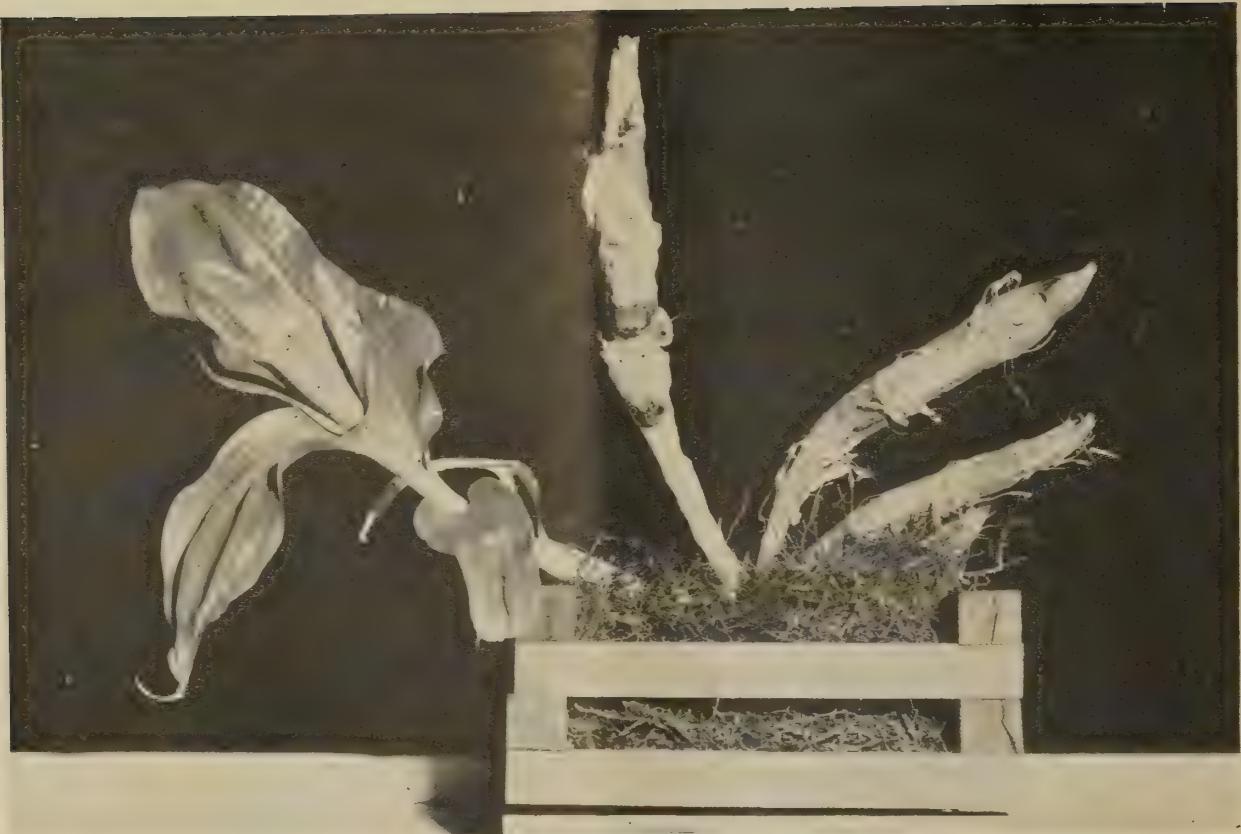

Bare Root \$3.50

Mounted \$4.50

BRASSAVOLA NODOSA PURE WHITE  
"Lady of the Night" Flowers in abundance, blooms several times a year.

Bare Root \$4.00

Mounted \$4.50

**CHYSIS BRACTESCENS** - Flowers to 4 inches across. 3 to 8 Flowers, partially drooping racemes, ivory with yellow lip marked with red or purple. We always have many plants of this variety.

Bare Root \$2.50

Mounted \$3.50

Specimen Mounted \$5.00

**CHYSIS LAEVIS** - Appearance same as above, only yellow flowers early summer.

Bare Root \$3.00

Mounted \$4.50

## VANILLA

Why not grow your own. This is a true Orchid. *Vanilla Planifolia*, 12 to 14 inches cuttings. This is grown on totums, like philodendrons, flowers greenish to yellow about  $2\frac{1}{2}$  inches across. Many flowers pods, 3 angled, 6 to 9 inches long cutting 12 inches and up. \$2.00 not mounted.

## **Brassia Verrucosa (Guatemala) Bare Root 3.00 - Mounted 4.00**

Pseudo bulbs, flatly ovoid, 3 to 4 inches high. Leaves 6 to 12 inches. Scapes arching 1 to 2 feet long, bearing 6 to 15 flowers spreading, the segments narrow, pointed, Sepals nearly 4 inches long. Petals half their length, greenish with black purple. Lip white, warty with black-green. Bloom. Spring and Early Summer.

**CHYSIS BRACTESCENS FLOWER**

Brassia Culture: Like Oncidium but resting season not so pronounced. Plants impatient if too much compost around them. Like Laelia have tendency to rise and extend beyond pot or pan. Drainage should be good and compost kept open with broken crock. Moist atmosphere when growing is essential.

LYCASTE AROMATICA

## *Maxillaria*

Assorted varieties of Maxillaria including Teniuifolia. We always receive several of these plants in each shipment and they are nice not to let someone have the pleasure of growing them and watching their interesting blooms.

\$ 3.00

## *Cyrtopodium Punctatum*

EPHIPHYTIC or TERRESTRIAL—We prefer to plant them in a rich mixture of soil and leaf mold. Long plaited leaves and flowers in lateral racemes or panicles, the sepals and petals nearly equal the lip 3 lobed; sepals greenish yellow irregularly spotted with brown, lip with narrow claw yellow edged with red or madder purple, February to May. Bare Root plants \$3.50 Large \$ 5.00 Larger \$10.00.

GONGORA GELEATA—Pseudo bulbs 1 3/4 inches long leaves to 1 ft. long, and 1 3/4 inches wide flowers, brownish yellow or wine color, on arching pedicels in racemes to 8 inches long June to September. Mexico.

Bare Root \$ 3.00

LYCASTE AROMATICA — Fls 2 1/2 in. across. Orange yellow very fragrant. A small plant will often have several flower stems. The lip is often spotted with red. January, April, October.

Bare Root \$ 3.50

Lycastes grow better Potted

LYCASTE DEPPEI— Flowers to over 4 inches across. Greenish spotted with red. Petals ivory white, lip white and yellow spots.

Bare Root \$ 3.00

CYRTOPODIUM PUNCTATUM

*Catasetums Integerrimum*

\$ 3.50 To \$ 5.00

*Catasetums - Several*

Un-named Varieties \$ 2.50

*Talandsia Ionantha*

Small (Bright Red) in winter

Clumps \$ 1.00

*Ornothocephalus Bicornus*

Miniature - Fan shaped - has lovely tiny white fls.

Mounted on fern

\$ 2.00

\$ 2.50

# LISTING OF SPECIMENS

## This list is for people that want large specimen plants

Many people do not want to wait for plants to grow until they become show material, the Orchids listed here are the same varieties that you will find listed elsewhere in this booklet. In every shipment that comes in from the jungle there are always large specimen plants, we have been dividing them in to several divisions. We have many customers that would rather have one large plant than a dozen small ones. We receive hundreds of letters asking for this class plants.

Do not send the complete amount for your order. We don't always have them on hand. Just send a deposit of 25% with your order, we will notify you when they are available and you can send your check for the balance or we will ship C. O. D. On orders for 10 or more of these plants discount 25% from total. These are all very large and we will ship Express Collect.

We do not consider but a few varieties of orchids a full size plant unless it has 5 or more bulbs. There are a few exceptions, such as Cycnoches and Catasetums. Many times an Oncidium Cebolleta will bloom from 3 bulbs. We have specimens with as many as 20 bulbs that will have 5 or more blooms spikes. These plants listed here are several times the size of regular plants. We have had Chysis and Mormodes that would weigh from 7 to 10 lbs. This is the type plant people like to use for shows. All the plants listed here are of that quality.

*Brassavola Digbyana* - regular . . . . . \$ 5.00

*Odontoglossum Citrosmum* . . . . . 10.00

" *Pulchellum* - this is naturally a small plant but we get large ones 5.00

" *Leucochilum* . . . . . 10.00

" *Rossii* - these are usually very small plants but we have found a location where they have never been collected before and we have plants that you could make 10 ordinary plants from one . . . . . 8.00

" *Rossii* - very large but not the very huge clumps . . . . . 5.00

" *Bicotoniense* . . . . . 10.00

*Epidendrum Mariae* - This is naturally a small growing plant  
(Large for Specie) . . . . . 7.50

" *Aromaticum* . . . . . 7.50

<i>Catasetums</i>	.	.	.	.	.	.	12.50
<i>Stanhopea Tigrina</i> - In Basket	.	.	.	.	.	.	10.00

PLEASE DO NOT MISUNDERSTAND US AND THINK THAT THE PLANTS WE HAVE LISTED ARE INFERIOR. THEY ARE NOT. These plants are just so much greater in size that we hate to break them up. We believe many of our customers will appreciate specimens like these.
